On “MUNICIPAL SOLID WASTE & PLASTIC WASTE MANAGEMENT”  
Sponsored by Ministry of environment & forests, Govt of India  
Supported by Pollution control Board –Noida  
**On 6<sup>th</sup> & 7<sup>th</sup> January 2010**

Dear Sir/Madam,

**Introduction:-**

The above programme has been sponsored by Ministry of Environment and forests, Govt. of India, vide letter Ref No:-6-14/2006 HSMD dated 5<sup>th</sup> February' 09.

The solid waste including the plastic waste is posing problem for environment with regard to segregation disposal and utilization especially in big cities and smaller towns in our country. A serious concern has been expressed for handling the solid waste and the same are gathering attention of Ministry of Environment & Forests, Municipal Corporation and public at large. With a view to manage this problem and keep our society and Environment clean & healthy, the Ministry of environment & Forests Govt of India has decided to create an awareness of the solid waste Management disposal and its subsequent utilization through organizing workshops and training programmes throughout the country. HRD Foundation has got the privileges of sponsorship from Ministry of Environment and Forests, Govt of India , and NMA has also got privilege to associate with such cause of environment specially for Noida, greater Noida and NCR Region.

**Programme Objectives:-**

- To make aware about legislative and technical requirement for Municipal and plastic Waste Management among the main Targets Groups. Their respective roles Duties and responsibilities in ensuring effective waste Management of all Municipal wastes generated at domestic, institutional, commercial and hospital activities with specific focus on Segregation of waste through garbage collector Instead of at sources for further operations to minimize environment pollution aspects and impact.
- The focus of the programmes will be on
  - a) Modern garbage dumping with biogas cum power generation
  - b) Modern septic Tanks for domestic and hotels.
- Appreciation of hazards of discarded Electrical and electronic items of common use containing highly toxic heavy metals and other chemical that can cause Chronic liver kidney and other damages and cancer Care required at each level of community to prevent pollution of air, water and soil environment from these Innocuous looking waste materials.
- To highlight the Environment hazards of plastic waste and its management.
